- Electronic hour meter
- Emergency kill switch
- Sealed bearings
- Easy to operate & maintain
- CDE available with 20Hp Honda GX630 V-Twin petrol engine *
- Also available as PTO unit

150mm Drum-Style Gravity-Feed Chippers

The 4150 gravity-feed series is built for the same applications as the smaller 4100 series, except that it boasts a wide in-feed opening, which allows this unit to pull material with small side branches in with ease. The perfect unit for a garden service or company clearing small branches on a housing estate. The discharge chute can swivel 360 degrees and the chip deflector allows the operator to control the direction of the chip discharge. This model is very easy to operate and has extremely low maintenance costs. The engine-driven CDE unit is built standard on an SABS roadworthy trailer and is easy to move around by hand once hooked off. The CDE also comes standard with a spare wheel and toolbox. The CDP is the only PTO-driven gravity-feed chipper in our range. A PTO-shaft is included with the unit and the well-positioned connection points allow for quick connection to the tractor.

TECHNICAL DATA	
In-feed opening	240mm x 170mm
CDP (L x W x H)	1.85m x 1.1m x 2.3m
CDP weight	580kg
CDE (L x W x H)	3.5m x 1.82m x 2.3m
CDE weight	610kg
CDE engine	13Hp - 20Hp Honda*
PTO Required	40 - 60 Hp Tractor
