- Also available as 4150 AFSE:**
- Single in-feed roller
 - Manual forward/reverse bar (no electronic feed system)
 - Honda GX630 Petrol engine

150mm Drum-Style Hydraulic-Feed Chippers

The ideal unit for plot clearing, small rental companies and landscaping contractors. It's the perfect wood chipper to chip pine, black wattle, Port Jackson, rooikrans and even small orchard prunings on your farm. This wood chipper is built on an SABS roadworthy trailer and available in two engine options: 20Hp Honda GX630 V-Twin petrol engine or a 35 Hp Perkins diesel engine*. The AFE range is fitted with a reversing auto-feed function, which controls the feeding of the chipper automatically when chipping large branches. The wide in-feed opening minimizes downtime as it swallows material with side branches without the hassle of pre-pruning the material. The dual in-feed rollers allow for more control over hard and awkward material. A forward/reverse bar is used to control the direction of the feed roller. This chipper requires minimal maintenance, is easy to operate and service. This model is also available in PTO.
