- Also available on farm trailer
- Sealed bearings

- Also available as 4150 AFSP:**
- Single in-feed roller
 - Manual forward/reverse bar (no electronic feed system)
 - Built on 3-point PTO frame

150mm Drum-Style Hydraulic-Feed Chippers

Looking for a versatile unit to chip general garden waste on your estate, seasonal or-chard prunings and assist with chipping pine, black wattle, port jackson branches on your farm? Don't look any further! The Model 4150 is fitted with a reversing auto-feed (TRAC) unit, which controls the feeding of the chipper automatically when chipping large branches up to 150mm in diameter. It is very easy to hook onto the 3 point of the tractor and the wide in-feed opening minimizes downtime as it swallows material with side branches without the hassle of pre-pruning the material. The dual in-feed rollers allow for more control over hard and awkward material. A forward/reverse bar is used to change the direction of the feed. This chipper requires minimal maintenance and is easy to service. This wood chipper is also available as a trailerized PTO unit or on as an engine driven unit on an SABS roadworthy trailer.

TECHNICAL DATA

In-feed opening	250mm x 180mm
Length	2100mm
Width	1450mm
Height	2200mm
Weight	980kg
PTO required	40 - 60 Hp tractor
Hydraulic tank size	30 litres
