

APPLICATION Citrus Farming | Pecan Nut Farming | River Rehabilitation | Alien Clearing | Macadamia Farming

WOOD CHIPPER FEATURES

- 60 - 80 Hp required
- Electronic reversing auto-feed
- Large & powerful hydraulic in-feed rollers enhancing efficiency
- Fans on drum sides for increased discharge velocity
- Lock-pin on drum for easy blade maintenance
- Double hydraulic filtration system to enhance component life
- Hydraulic Lift & Crush feature
- Climax coupler system
- Clip-on belt-cover allows for easy inspection & maintenance
- Replaceable wear strips
- 360 degrees swivel discharge chute
- PTO shaft with overrun clutch

200mm Drum-Style Hydraulic-Feed Chippers

The Model 4200 AFP is designed for fruit farming operations and alien clearing projects where the wood chips are utilized for mulch or compost. This unit features large diameter in-feed rollers that climb effortlessly onto fruit tree branches and the fans on the sides of the drum enhance discharge velocity and efficiency. A lock-pin is located at the side of the drum to make blade changing safer and quicker. The in-feed opening of 260mm x 230mm reduces prep-time on material and the lift & crush feature allows the operator to crush stubborn side branches in a split second.

The chipper and tractor are protected by an electronic reversing auto-feed computer, which ensures that the machine cannot be over-fed, increases chipping blade life and reduces fuel consumption. Components that require maintenance are easily accessible, which limits downtime. The Model 4200 AFP is built standard on a farm trailer and is also available on a PTO base that hooks on the 3-point and sits 180° in line with the tractor.

TECHNICAL DATA

In-feed opening	260mm x 230mm
Length	3675mm
Width	1820mm
Height	2600mm
Weight	1370kg
PTO required	60 - 80 Hp tractor
Hydraulic tank size	60 litres
